

**BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA**

In the Matter of the Application of Southern  
California Edison Company (U 338 E) Regarding  
the Future Disposition of the Mohave Generating  
Station.

Application 02-05-046

**ADMINISTRATIVE LAW JUDGE'S RULING  
CLARIFYING REQUEST FOR ADDITIONAL TESTIMONY**

On August 22, 2003, I issued an Administrative Law Judge's ruling requesting additional testimony on projected costs and timelines for options at the Mohave Generating Station (Mohave). On September 3, 2003, The National Resources Defense Council (NRDC) filed a motion seeking clarification on the topics requiring additional testimony. In particular, NRDC wanted to know if the Commission wanted testimony on energy efficiency alternatives or portfolios of alternatives for Mohave. In addition, NRDC requested clarification from the Commission concerning the location of an Integrated Gasification Combined Cycle (IGCC) facility.

The Commission is interested in receiving testimony from as many sources as possible as to options for the Mohave facility. The list of topics included in the August 22, 2003 ruling was not meant to be exhaustive, or limiting. Any party having information on energy efficiency alternatives or portfolios of alternatives is invited to submit it. In regards to the location of an IGCC facility, again, the Commission is interested in any feasible suggestions, supported with testimony.

**IT IS RULED** that additional testimony on projected costs and timelines for all supportable options at Mohave Generating Station will be accepted.

Dated September 8, 2003, at San Francisco, California.

/s/ CAROL A. BROWN
